SUMMARY

Fifth-semester Computer Science student targeting a Cloud Engineer role. I build AI/Machine Learning models, backends, and web frontends, and deploy them on GitHub Pages, Hugging Face, and Vercel. Holder of a Google Cloud Computing certificate.

EDUCATION

BINUS University Bandung - Bachelor of Science (B.Sc.) in Computer Science, 08/2024 - Present
- Currently in semester 5; GPA 3.21 (semesters 1-4)

PROJECTS

Potato Disease Detection | Machine Learning and Full-stack Developer
- Built an AI web app that detects potato leaf diseases from a photo and returns a diagnosis, confidence score, and advice; developed the model, backend, and interface. Tech: Python, Machine Learning, HTML, CSS. Demo: marvin173-digital.github.io/potato-disease-ui

Tea Disease Detection | Machine Learning and Full-stack Developer
- Built an AI web app that detects tea leaf diseases from a photo with diagnosis, confidence score, and advice; developed the model, backend, and interface. Tech: Python, Machine Learning. Demo: marvin173-digital.github.io/tea-Leaf-Disease-Detection

MyFakeStore (Front-end Final Project) | Full-stack Developer
- Built an online store with product search and filters, cart, checkout, order history, login, and top up. Tech: Next.js, TypeScript. Demo: tugas-akhir-front-end-rlkm.vercel.app

Website To-Do List | Frontend Developer
- Built a task manager with deadlines, search, and custom background, color, and font. Tech: HTML, CSS, JavaScript. Demo: marvin173-digital.github.io/website-to-do-list

CERTIFICATIONS AND ACHIEVEMENTS

- **Presenter, ICT for Smart Society (ICISS) 2026**, Institut Teknologi Bandung, 08/2026. Paper: "Early Detection of Potato Leaf Disease Using Deep Learning" (co-author)
- **Google Cloud Computing Certificate**
- **BNCC Front-End Development**, Certificate of Completion, High Distinction (2024/2025)
- **BNCC UI/UX**, Certificate of Completion, High Distinction (2024/2025)

ORGANIZATION EXPERIENCE

BNCC (Bina Nusantara Computer Club) | Member, 09/2024 - 07/2025
- Took part in club events and worked on team projects

SKILLS

Cloud and Deployment: Google Cloud, GitHub Pages, Vercel, Hugging Face
AI and Machine Learning: Python, Machine Learning, Google Colab
Web Development: HTML5, CSS3, JavaScript, React (Vite), Next.js, Bootstrap, Laravel, PHP, UI/UX
Databases and Languages: MySQL, PostgreSQL, Supabase; Python, C, Java, C#
Tools and Methods: Git, GitHub, VS Code, XAMPP, Waterfall, Network Configuration

ADDITIONAL ACTIVITIES

- BNCC TechDive 2025 "Cloud-Powered Transformation"; BIFEST ElevAIte Microsoft "The Next AI Generation" (2025); 20+ seminars and workshops (2024-2026)
- Volunteer in four environment and education community activities (2024-2026)
